# **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

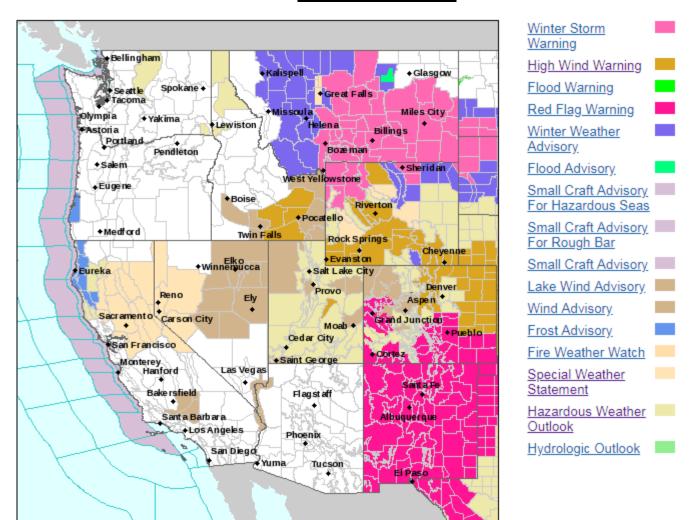

A weak wave and cold front will swing across the Pac NW and clip northern portions of the region today. Very little moisture and wind impacts will result. High pressure will build tonight and last through Wednesday before gradually breaking down later in the week. Drier conditions expected Tuesday and Wednesday. Northerly winds expected today before turning to a southerly flow Tuesday and Wednesday. Gustier S-SW winds will affect northern and eastern portions of the area Wednesday afternoon. Expect gusts up to 30 mph at times. The drier and warmer weather pattern is expected to shift towards a wetter and cooler one Thursday and Friday with lasting effects into the weekend. The ridge will gradually break down and allow waves of moisture to flow over the region. The main precipitation chances should occur Friday and Saturday when the moisture levels are at their highest. The pattern suggests more rain than snow, even at the higher elevations, for much of the event period. This will be a wetting event. The wind flow will generally be a southerly one with periods of stronger S-SW wind gusts.

#### **SOUTHERN CALIFORNIA**

The back side of a weak Pacific trough will bring near normal temperatures today, with 50s to low 60s across the mountains and mid 60s to mid 70s in the valleys. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface through the desert passes through this evening. A weak ridge of high pressure will build into California from the southwest causing temperatures to warm to the upper 50s and 60s across the mountains and 70s to low 80s in the valleys Tuesday through Friday. Minimum humidity will be mainly between 20% and 40% away from the coastal areas through Friday. A Pacific trough will bring showers to the area Friday night through Saturday night. Heavy rainfall totals are possible from a Monterey/Fresno County line northward. Only light rainfall totals will occur across the region. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Friday afternoon through Sunday morning. Temperatures will cool to a little below normal this weekend.

# **WEATHER MAP**

# **Cal OES LAW ENFORCEMENT MISSIONS**

# **Cal OES Law Missions**

Nothing to report.

# **Cal OES MISSION TASKING**

#### **Cal OES Missions**

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties. (On Scene Long-term assignment)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County (Coordinating)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- **2017-Inland-42559:** Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

# Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
